

• Measuring Your Kitchen

**IT DOESN'T HAVE TO BE A WORK OF ART...
IT DOESN'T HAVE TO BE TO SCALE...
JUST ACCURATE AND LEGIBLE**

Draw an outline of the walls of your kitchen.

Don't worry about the doors, windows and other openings for now.
Pick a corner as your starting point and mark it "Start".

A. Measure each wall from corner to corner. Measure to the 1/4".
Note the measurement in inches on your drawing.
(Your designer will verify your measurements when we have a finished design.)

B. Draw in the doors. openings and windows.

C. Measure from your starting point to the **outside of the trim of your first opening**. Note the measurement. Measure from the **outside of the trim to the outside of the trim** of that first opening. Note the measurement. Continue along the wall remembering to measure from the **outside of the trim to the outside of the trim**.

D. Now check yourself. **The sum of the measurements in C should equal the total wall measurement in A.** If they don't equal – re-measure.

E. From a corner, measure and note the center lines of your existing sink and range.

F. Measure the floor to ceiling height. Enter on the diagram below. Measure the height and depth of any soffit. Enter on the diagram below
